SUMMARY

Senior Product Engineer who owns solutions end-to-end: from user-facing features and API design to distributed processing and production monitoring. 5+ years of experience, including 4 on a B2B SaaS serving 30+ enterprise clients (including billion-dollar global companies), plus co-founder experience taking a product from zero to launch.

TECHNICAL SKILLS

Frontend · React, Next.js, TypeScript, JavaScript, HTML/CSS

Backend · Go, Python, Node.js, REST APIs, Microservices, SDKs, Background Workers

Data · PostgreSQL, Prisma, Redis, Apache Kafka, ETL, Data Pipelines

AI · RAG Systems, LLM Integrations, AI-Powered Product Features

Cloud & Ops · AWS (ECS, Lambda, S3, RDS, SQS), Docker, Cloudflare, Prometheus, Grafana, CI/CD

EXPERIENCE

VE3 — Enterprise Data Platform (B2B SaaS)

Senior Software & Data Engineer — Full Stack / Platform Focus | Aug 2022 – Present | Remote, Brazil

Promoted 3× in 4 years: Intern (Aug 2022) → Junior (Apr 2023) → Mid-level (Jan 2024) → Senior (Jul 2025)

- Built product-facing analytics integrations and the backend services behind them for a global B2B SaaS serving **30+ enterprise clients**, including billion-dollar companies operating worldwide.
- Shipped a production **RAG system** and am building its interactive in-product interface — end-to-end AI feature ownership from backend to UI.
- Architected REST APIs, SDKs and microservice orchestration in **Go** and **Python** for high-volume, multi-tenant workflows.
- Developed workers, queues, scheduled jobs and pipelines on **AWS**; supported a forecasting platform with **25+ predictive models** over millions of records.
- Optimized PostgreSQL: **75% faster dashboards, 50× lower query load**.
- Implemented full production observability with Prometheus, Grafana and CloudWatch.

Self-Employed — Software Developer | Feb 2021 – Aug 2022 | Remote

- Delivered production web applications and Python automation for clients, eliminating recurring manual operational work.

PROJECTS

Plan Patagonia — Co-founder (0→1)

TypeScript, Next.js, React, Prisma, Neon Postgres, Docker, S3, Cloudflare, SEO, Claude API

- Co-founded a US-registered travel-tech company; architected and built the entire platform from zero to launch, combining product engineering, AI integrations, SEO infrastructure and business strategy.

Multi Agent Loop — Open-source AI Orchestration (in active development)

Go, Python, LLM APIs, Kubernetes, Docker · github.com/tzpereira

- Multi-agent orchestration system for autonomous task execution — agent coordination, tool use, memory and observability designed for production patterns.

Kafka Go SDK — Open Source

Go, Apache Kafka · github.com/tzpereira

- Public Go SDK that simplifies Kafka producer/consumer patterns — abstractions for connection handling, retries and message processing.
